General Information

# Business Overview

## Leadership and Vision

The company adopted the following mission statement for its development direction:

*“To create value today for a better tomorrow, by developing product excellence, and adhering to good governance.”*

## AFC Quality Policy & Values

We are committed to continuous improvement

For complete customers' satisfaction

With product variety and work precision

Emphasizing quality, delivery, and pricing

Together with environment preservation as our common goal

## Energy Policy

The company is committed to optimum energy conservation in every part of the organization, with the ISO 50001 Energy Management Standard as out target. The company introduces the following energy management systems to all units in order to minimize global warming effect, and to attain continuous and sustainable effectiveness in energy conservation.

1. Properly develop and execute energy conservation systems as a part of company's operation, in compliance with the relevant laws and regulations.
2. Improve energy efficiency continuously and appropriately according to the usage, technology, and best practice.
3. Set plan and target for energy conservation each year, and communicate to all employees for understanding and correct execution.
4. Energy conservation is considered the responsibility of employees at all levels to cooperate, in compliance with the laws and relevant regulations, and all efforts are monitored and reported to management.
5. Procurement of machinery, tools, production equipments, and services will be made with consideration on their energy efficiency.
6. Support energy development initiatives with necessary human resource, budget, work hours, training, and participation.
7. Energy policy, plan, and targets are to be reviewed and improved each year whenever there is change in production process or revision of energy management system as appropriate.

## Environment Policy

Realizing the importance of environment, energy conservation, and natural resources toward sustainable manufacturing, the company is determined to:

1. Comply to environmental laws and regulations of Thailand
2. Strive for pollution protection and continuous improvement to reduce production wastages
3. Strive to reduce energy and water consumption through cleaner technology
4. Communicate this policy to all employees and the general public
5. Set up objectives and goals to achieve this policy effectively, and provide for periodical reviews of such objectives and goals

## Safety, Health, and Environment in the Work Place Policy

The company is concerned about the safety of life and well being of employees in the work place, and endeavors to promote better work environment, safe work procedures, and being free from work-related accidents and diseases by

1. Promoting safety activities, and improvement of work place and environment
2. Providing appropriate tools and protection equipments for work
3. Having employees aware and mindful of the safety of their own, their co-workers, and company's assets while they perform their work
4. Stressing that all employees cooperate in preventing accidents, and maintain order and cleanliness of their work place
5. Stressing that all employees work safely according to the company's regulations on "*Safety and Health*", and have the right to suggest improvement for safer work place and work procedure

## Company History and Milestones

Asia Fiber Public Company Limited was established in 1970 to produce nylon filament and nylon textured yarn with privileges as promoted of the Board of Investment (BOI). It was the first company to produce taffeta of nylon or other synthetic materials using water jet looms, the high speed, advanced technology equipments that use water to propel the weft yarn. This product quickly gained acceptance from both domestic and overseas market.

### In 1975

the company was listed on the Stock Exchange of Thailand

### In 1993

the company became a public company

### In 1995

the company was certified with ISO 9002 standard

### In 2002

the company was certified with ISO 9001:2000 from Det Norske Veritas Industry B.V., and its dyed textured yarn was certified international standard by Oeko-Tex Standard 100 from TESTEX Swiss Textile Testing Institute

### During 2000-2002

the company successively was pioneer in this region to introduce Fully Drawn Yarn (FDY) and Pre-Oriented Yarn (POY) production processes to its nylon line which resulted in reduced production steps and much higher speed, thus enhancing efficiency. The company also received certificate from the Ministry of Industry for passing the primary

cleaner technology assessment according to the Department of Industrial Works' Competitiveness Improvement through Cleaner Technology Program.

#### In 2006

the company was recognized as a "Lively Landscape and Environment-Friendly Factory", a Ministry of Industry program.

#### In 2007

the company received the EU Flower (European Union Eco-Label) certification, and develop anti-bacteria products.

#### In 2009

the company adopted the ISO 9001 : 2008 and ISO 14001 : 2004 standards, and on December 16, 2009, was approved the carbon footprint of one of its products.

#### In 2015

the company adopted the ISO 50001 : 2011

#### In 2017

the company adopted the ISO 9001 : 2015 and 14001 : 2015

The company is still recovering from the 1997 financial crisis. Production was modified from high volume to low volume with stress on quality and product variety to better serve consumers and market demands. Production precision was improved, especially in the consumption of raw material, energy, water, and other resources. Production waste was reduce effectively through group activities that include 5S's, TPM, water and energy conservation trainings, lean manufacturing trainings, etc. New, faster, and more efficient equipments were also added. On marketing, good service and responsiveness were stressed. Regular survey on market demand was conducted regularly, and new products were analyzed and jointly development with customers to answer to their exact demands. Financially, risks from exchange rates and liability were greatly reduced. Interest burden was eliminated and financial structure became stronger.

Over more than four decades, Asia Fiber Public Company Limited had maintained an important role in Thailand's textile industry. And with the determination of our staff, the company is determined to develop continuously in order to maintain leadership in Thailand nylon industry.

## Message from the Chairman

Furthermore, our existing machinery, despite years of service, were capably enhanced by digital control systems, resulting in more stable, higher quality products that matches those produced by world-class European producers, and well-recognized by our customers, both at home and abroad.

**Mr. Mongkol Mangkornkanok**

Chairman

Asia Fiber Public Company Limited

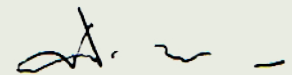

This year is the first year of my duty as chairman of the board of Asia Fiber Public Company Limited. It is indeed a great honor, and a very important opportunity to carry on the work of Khun Yodjin Uawattanasakul, my predecessor, in driving the company firmly into the future.

I would like to report to our shareholders that, in fulfilling my duty, I receive full cooperation from every board member, the management staff, and every employee in our endeavor to overcome obstacles, and push ahead with improvement in every aspect, in order to quickly deliver to our shareholders the financial returns according to the company's rightful potentials.

The company's performance this year is satisfactory as we have reversed the 2 years of consecutive loss. The small profit this year was achieved despite the unusual strength of the Baht encountered during the last quarter of this fiscal year due to the cumulative profit made during earlier periods, which was the result of many management decisions in the right directions. These moves, which improved profit margins, include emphasizing exports, focusing on competitive products and services, cost reduction, and downsizing or terminating uncompetitive products such as the decision to purchase grey fabric for dyeing and finishing instead of producing by ourselves. Furthermore, our existing machinery, despite years of service, were capably enhanced by digital control systems, resulting in more stable, higher quality products that matches those produced by world-class European producers, and well-recognized by our customers, both at home and abroad.

All of these achievements are only possible with the full cooperation from the board, the management team, and every employee, who tirelessly performed their duties to the best of their capabilities. Moreover, these achievements were also due to the patronage of our customers, suppliers, financial institutes, and our networks, and most importantly the understanding and support from our shareholders. I would like to take this opportunity to thank you all on behalf of the board of directors.

**Mr. Mongkol Mangkornkanok**  
Chairman

# Financial Highlights

# Business Structure

Asia Fiber Public Company Limited is a major manufacture of Nylon products to be used as raw material in industries. There are 5 main product groups and services as follow :

1. Nylon Chip : to be used for filament spinning in textile and fishing net industries.
2. Filament Yarn : various types and sizes of filament are produced from nylon chip, used for fabric weaving, some are used to produce Nylon Textured Yarn.
3. Nylon Textured Yarn : is produced from Nylon filament through the process of drawing and false twisting. This stretchable, fluffy yarn is used in fabric and sock knitting.
4. Taffeta Fabric : is the fabric woven from filament yarn. The fabric is also dyed and finished for enhanced look and quality.
5. Fabric Dyeing and Finishing Services : is performed on fabrics supplied by customers.

## State of the Industry and Competitions

During the past 12 months, the world economy had actually enjoyed a better growth than the previous period, with all eyes focusing on the United States of America. The election of President Trump, and his ensuing announcement of economic policy had brought about optimism and high expectation on the growth of the American economy, despite the risk of trade friction between the U.S. and her trading partners. Job figures continued to soar, reflecting the business confidence and investment, which, in turn, push the dollar to a record high during the end of 2016 and the beginning 2017. However, the new president settled to implement his policies, he encountered numerous obstacles, ranging from his appointment and removal of high-ranking officers, his social and welfare related policies, his appointment of close relatives to the center of power positions, etc. Meanwhile, many of his economic landmark policies did not materialized causing serious doubt on the American greatness that his campaign promised, and the dollar declined steadily.

In other regions, Europe had shown signs of stability and improvement. The financial crises in Greece, Spain, and Italy abated and stability returned, rendering a more stable Euro. Economies in China and Japan showed signs of recovery, and with a steady oil price, middle east's economies improved. Thus, attentions now shift to political conflicts such as the conflict between the U.S. and Russia on political interference, or the missile incidents in the Korean peninsula, which could flare into violence in the immediate future.

Meanwhile, the Thai economy continue to recover with 2016 GDP rising 3.2% compared to 2015 GDP of 0.8%. Export rose for the first time in many years, and continue to rise significantly in the first half of 2017. Revenue from tourism which stalled in the latter half of 2016 due to the crackdown on Zero Dollar tourism recovered and

grow further in 2017 as the quality of tourists improved. Agricultural sector improved from last year as there is plenty of water in the reservoirs as compared to critical levels last year. These factors combined to render an average current account surplus of more than 1 billion U.S. dollars per month during the first half of 2017. These surpluses together with the inflow of foreign funds and the weakening U.S. dollar pushed the Baht to a record high during the second quarter of 2017, and higher than other currencies in the region, making Thai products more expensive than our competitors. This effect could hurt the Thai

industries' competitiveness in the long run.

The Thai industrial sector continued to grow even though new investment is not yet apparent due to the capacity utilization rate remains around 60%. However, the gradual improvement and modernization of machinery and process show a clearer sign, which is one of the reasons Thai exports improve significantly this year. If the government has clear and strong measure to support innovation and automation in manufacturing, together with a close cooperation between the industry sector and the academic sector, Thai industry could attain a new level of development and rise to the world's challenges.

The Thai textile industry on the other hand remains dormant despite the clearer demand from the market for new textile products with functions, e.g. anti-bacteria, heat

and moisture transfer, etc., but only a few textile manufacturers can supply such materials, most of them multi-national companies with R&D facilities overseas. In order to enhance local companies to embark on R&D work, the government should provide laboratories or pilot plants which are essentials in developing new materials in textile. These facilities can also serve as venue for collaborations between manufacturers and academic talents, to render Thai textile companies capable of meeting the challenges, both at home and abroad, of becoming the major supplier of textile materials for this region and the world in the near future.

## Risk Factors

Aside from the financial risk factors included in the Notes to Financial Statements in the auditor's report, business risk factors can be described as followed:

**1. Product.** The company produces Nylon-6 material, which is relatively more expensive to produce than other synthetic yarns. Hence, there remains the risk of substitution by cheaper materials in some applications. However, with its special characteristics, Nylon-6 is still the principal material for certain applications such as socks, hosiery, tent, umbrella, fishing net, etc. This feature, combined with the rather limited production capacity and expansion, provides a relatively stable balance between demand and supply. The fact that other materials like polyester were already utilized by the company, and developments on new products, including the investment on more flexible machinery to better respond to market requirement, helps mitigate this risk factor.

**2. Raw Material.** Raw material, Caprolactam, represents the largest portion in the cost structure. Hence, its price fluctuation and the timing of purchase is vital to the performance of synthetic yarn manufacturers. Recently the price of Caprolactam becomes highly volatile. The company's strategy remains to closely monitor the price movement, and to ascertain the price of each lot of raw

material prior to delivery. Selling price would not be offered until the cost and quantity of the raw material is obtained. This way the company knows exactly the cost of each lot of product sold. It should also be noted that this risk factor was already mentioned by the company's external auditor in this year's auditor's report.

**3. Dumping of products from overseas due to reduced import duty.**

Following government's policy to accelerate import duty reduction and restructuring, import duty of all company's product fell to 5%, in accordance with the product category. This rate is relatively low compared to competing countries, which encourages dumping from larger overseas manufacturers who are more capable and have cost advantages. Toward this risk, the company emphasizes production efficiency and reduction of resource consumption in order to be competitive on cost, while focusing on joint development with customers on new products that respond better to customers' need, and providing closer, quicker, and better services that are relatively hard to be matched by overseas competitors. At the same time, the company continues to seek, through this duty reduction, new sources of raw materials or semi-finished products that can be imported for finished goods production at lower cost.

**4. Currency Risk.** The extreme volatility of the Baht recently had considerable impacts on many industries, e.g. apparel, shoes, furniture, food, etc., most of which had high proportion of their costs in Baht. The company's largest cost component is the raw material which is transacted in U.S. dollar for both the imported portion and the locally obtained portion, thus the risk level in this area is low. Furthermore, the export revenue each month closely matches the raw material purchase, further minimizing the outstanding risk. Nevertheless, the company exercises due care, and closely monitors the movement during high fluctuations, and executes forward transactions for the net exposure between revenue and expense in order to keep balance. This measure is effective and incurs minimal expenditure.

**5. Personnel Risk.** During the past few years, many of the company's executive

personnel had reached retirement age, posing a risk of loss in experience, knowledge, and work efficiency. This industry, meanwhile, cannot attract top level personnel from educational institute or other industries. Realizing this risk, the company has tried to build successors from within the organization. In cases where successors are not ready to take the helm, postponement of retirement was granted with agreement and cooperation from retiring personnel who remain healthy and willing to work.

**6. Business Risk.** Business risk includes risk of compliance to laws and regulations, product risk to consumers, risk of reputations, etc. The company is in the process of setting up a system of self risk assessment that will conform to the corporate risk abatement objective.

Risk	Type	Chance	Impact	Risk Factor before measures	Risk Mitigation Measures	Risk Factor after measures
Product	Operation	3	4	3x4=12	New material, product	2x2=4
Raw Material	Finance	3	3	3x3=9	Purchasing, quoting	2x2=4
Dumping	Finance	2	3	2x3=6	Constant monitoring, improve cost	2x2=4
Currency	Finance	3	3	3x3=9	Quoting, hedging	2x2=4
Personnel	Operation	4	3	4x3=12	New recruits, tenure extension	2x2=4
Business	Compliance	2	3	2x3=6	Risk management committee (in progress)	2x3=6

## Company's Secretary

Company's Board of Directors ruled to appoint Mrs. Jintana Thanatavee. She is qualified both in terms of qualification and seniority. She has been performing her duty as in Company's Secretary since August 20, 2008 with duties and responsibilities as being specified in Section 89/15 and Section 89/16 of Securities and Exchange Act (Issue4) B.E.2551 (2008). Duties of the Company's Secretary as being stipulated by laws, are as follow:

1. Provide and maintain following documents:
  - Directors' registration
  - Letter of Invitation for meeting of Board of Directors, Board of Directors' minutes of meeting and the Company's annual report.
  - Letter of invitation for meeting of shareholders and shareholders' minutes of meeting.
  - Keep report of stakeholding provided by Directors or Executives and submit copy of stakeholding report according to Section 89/14 to Chairman and Audit Committee Chairman within seven working days from the day that the Company receives the report.
2. Undertake other performances as being stipulated by Capital Market Supervision Committee.
3. Make suggestion for laws and related regulations and practices on supervision operation of the Board of Directors to be in line with laws.
4. Other duties as being assigned by the Company

The company was able to comply with guidelines for good practice of directors of listed companies, including rules and regulations according to the direction of the Stock Exchange of Thailand. There has never been any non-compliance or breach of the Stock Exchange of Thailand or the Security Exchange Commission rules and regulation by the company's directors. The company operates in accordance with the Stock Exchange of Thailand's proposed good corporate governance rules, as follow:

## Corporate Governance Policy

The Board of Directors issue corporate governance policy to enhance transparency and investors' confidence. The Board of directors is determined to adhere to the following principals:

1. Fair treatment to shareholders and stakeholders
2. Operate with transparency and accountability, and make sufficient disclosure to all parties concerned
3. Encourage work ethics and fair play in business conduct by management and employees

## Leadership and Vision

The company adopted the following mission statement for its development direction;

*"To create value today for a better tomorrow by developing product excellence and adhere to good governance"*

## Business Ethics

The company instructed the directors to comply with good practices for listed company's directors, according to the Stock Exchange of Thailand. Directors are aware of their role, duty, and responsibility to use their ability and experience to the benefit and ethics of the company's business. They also have to dispose their duty truthfully in compliance with the laws, objectives, company's regulations, and the resolutions of the shareholders' meeting within the company's and shareholders' best interest.

## Conflict of Interests

The company has taken prudent care to prevent conflict of interests in its approval process involving associated or related parties by adhering to honesty, rationality, independence, and transparency for the overall benefit of the company, and in compliance with the principles laid down by the Stock Exchange of Thailand, the Securities and Exchange Commission, company's regulations, and related laws. Furthermore, the company takes care not to allow directors, management, employees, or related persons to disclose or use inside information to their own benefit. Trading of company shares by directors and employees are also disallowed within one month prior to the release of financial statements. In meeting deliberations, persons with conflict of interest in the subject will not be allowed to attend or vote.

## Shareholders' Right

The Board of Directors realize the duty to protect the interests of big or small shareholders fairly according to their rights. Shareholders are encouraged to exercise their rights to protect their interests by voicing their opinion, suggestions, and voting in the shareholders' meeting, and by taking part in major decisions and changes. They are all accorded with accurate, complete, and equitable information and disclosure.

The Annual General Shareholders' Meeting is held within 4 months after the fiscal account closing date. The notice for the meeting is both sent to each shareholder individually, and displayed on the company's website prior to the meeting. ([www.asiafiber.com](http://www.asiafiber.com))

Furthermore, shareholders are given the opportunity to add meeting agenda, or propose candidates to be elected company directors, by requesting such agenda to be included in the Annual General Shareholders' Meeting.

## The company recognizes the right of every stakeholder as follow:

**Employees** provide training for advancement with the company, provide a safe and secure work atmosphere, provide proper remuneration and welfare, and enhance good working relations.

### Business Partners and Competitors

Fair treatment in contracts, no taking advantage through false representations or cover-ups, no unethical moves to destroy competitors.

**Customers** The company focuses on quality of products and services, fair prices, and maximizes customers' satisfaction.

**Auditors** The company cooperates with the CPA in the disclosure of information accurately and transparently.

**Government** The company is firm in abiding by the law and government's regulations, and cooperates fully with government sectors.

### Community, Society, and Environment

The company conduct business as a good citizen with duty and responsibility to the community, society, and environment, with emphasis on pollution control and continuous improvement of the environment.

## Disclosure and Transparency

The company emphasizes thorough and timely dissemination of information to shareholders and investors, through the following channels:

1. The Stock Exchange of Thailand (www.set.or.th)
  - i. Annual report
  - ii. Financial statements
  - iii. Resolutions of the Board of Directors, etc.
2. The Security Exchange Commission (www.sec.or.th)
3. The Ministry of Commerce
4. Newspaper
5. Company's website (www.asiafiber.com)
6. By post

Furthermore, shareholders or investors with questions can also contact the company's secretary by phone at 0 2632 7071

6. to prepare, and to disclose in the Company's annual report, an audit committee's report which must be signed by the audit committee's chairman and consist of at least the following information:
  - 6.1 an opinion on the accuracy, completeness and creditability of the Company's financial report,
  - 6.2 an opinion on the adequacy of the Company's internal control system,
  - 6.3 an opinion on the compliance with the law on securities and exchange, the Exchange's regulations, or the laws relating to the Company's business,
  - 6.4 an opinion on the suitability of an auditor,
  - 6.5 an opinion on the transactions that may lead to conflicts of interests,
  - 6.6 the number of the audit committee meetings, and the attendance of such meetings by each committee member,
  - 6.7 an opinion or overview comment received by the audit committee from its performance of duties in accordance with this charter, and
  - 6.8 other transactions which, according to the audit committee's opinion, should be known to the shareholders and general investors, subject to the scope of duties and responsibilities assigned by the Company's board of directors; and
7. to perform any other act as assigned by the Company's board of directors, with the approval of the audit committee.

### **Nomination and Remuneration Committee has the following responsibilities**

1. To establish criteria for Board membership;
2. To formulate a standard and transparent process for the selection of directors;
3. Set the directors' remuneration policies.
4. To carry out any other acts as assigned by the Board of Directors.

### **Qualification of Independent Director**

Members of the company's audit committee are directors who qualify as independent directors according to the good governance principles of the Stock Exchange of Thailand and the Security Exchange Commission, which include

1. Holds less than 5% of the voting shares in the company, affiliated companies, related companies, including shares held by related person(s).
2. Does not involve with management, not an employee or fixed income advisor, auditor, legal advisor, affiliated or related company, or person who may have conflict. This non-involvement condition must exist for at least one year prior to the appointment.
3. Does not have business relation, benefits or stakes, directly or indirectly, both financial or operating sides of the company, affiliated and related companies. Not a person with conflict which could impair his (her) independence.
4. Is not close relatives to management, major shareholders of the company, affiliated or related companies. Not a person with potential conflicts, or the protector of director's or major shareholders' interests.

### **Appointment of Board Directors**

The Board of Directors consists of no fewer than five and no more than 28 persons to be elected at a general meeting of shareholders. Additionally, no fewer than one-half of the board of directors must have residence in Thailand. The election of Company directors at general meeting of shareholders is to be carried out in accordance with the following criteria and procedures:

1. The number of votes of each shareholder is equivalent to the number of shares held.
2. Each shareholder must cast all his/her votes, as determined in (1), to select one or several candidate (s) to be Board member(s), and may not divide his/her votes among candidates.
3. Depending upon the number of posts to be filled at that time, the person or persons receiving the highest number of votes are to become members of the Board. In the event that two or more persons receive an equal number of votes and the number of such persons exceeds the number of posts to be filled on the board, the Chairman of the Board of Directors shall cast the deciding vote.

At a meeting of shareholders, a member of the Board may be removed from his/her post prior to the scheduled end of term by a motion approved by three-fourths of the voting shareholders in attendance, representing not less than 50% of the shares held by voting shareholders attending the meeting.

## Assessment of Board's Performance

The Company's Board of Directors has not yet set up a system for assessing the Board member's performance.

## Continuing Education of Directors and Management

The Company promotes and facilitates training and the continuing education of those who are associated with the corporate governance system such as directors, audit committee members.

Sixteen of the Company's directors have attended Director Accreditation Program which is organized by Thai Institution of Directors (IOD).

Two of the Company's directors have attended Director Certification Program which is organized by Thai Institution of Directors (IOD).

## Corporate Governance of Associated Company

The company assigns directors to sit on the board of the related company to closely manage its operation.

## Surveillance on use of inside information

Details in Conflict of Interests

## Corruption, Bribe, or Gift

Corruption and bribe, both inward and outward, are strictly prohibited. Gift outside of tradition and culture is limited and discouraged.

## Auditors' Remuneration

### (1) Audit fee

- |   |              |
|---|--------------|
| - Audit fee of the Company              | 650,000 Baht |
| - Audit fee of the associated companies | 111,000 Baht |

**Remark** As the associated companies are not listed on the Stock Exchange of Thailand (SET), there is no requirement for their financial statements to be reviewed each quarter. The only reason why the quarterly reviews are carried out on the associated companies is to facilitate the quarterly reviews of the Company's financial statements. The quarterly reviews of the associated companies improves the Company's accuracy in the accounting for the share of results of these companies under the equity method.

### (2) Non-audit fee

- None -

## Other

- None -

## Social Responsibility and Environment

The company realizes that, in order to continue business sustainably, framework and direction of cost reduction and production efficiency must be instilled through systematic management of raw material, energy, and water consumption, with regards to impact on environment and community.

## Policy and Concept

The company realizes that, in order to continue business sustainably, framework and direction of cost reduction and production efficiency must be instilled through systematic management of raw material, energy, and water consumption, with regards to impact on environment and community. These are arranged into policies and concepts as follow:

1. Creation of product value and economic impact – Quality Policy.
2. Reduction of impact on environment and society – Environment Policy.
3. Creation of social value and reduce impact on health in work place - Safety, Health, and Environment in the Work Place Policy
4. Reduction of global warming effect – Energy Policy

Each policy is systematically and continuously deployed, benefiting customers, employees, community, and suppliers.

The management's of quality, energy, and environment are certified by ISO9001, ISO14001, and ISO50001, and serve as an important foundation toward a well-structured, responsible, and clearly targeted business process that is highly rewarded through continuous practice.

1. The execution is well structured and closely monitored by high-level executives, with section managers as committee members. Continuously for more than 25 years, implementations in marketing, cost control, administration, quality and environment, clean technology, and energy are steered and monitored in

monthly or bi-monthly meetings as deemed appropriate, where corrections and improvements were discussed, summarized, and followed-up.

2. Each section is required to set objectives, with Key Performance Index to measure level of success in creating tangible impact on products, environment, and cost saving.
3. Target and results from implementation will be evaluated according to objectives. Production refinements and other modifications have been made throughout the company's existence, and organized as knowledge management that can be accessed by employees through the company's intranet.
4. Risk assessment and monitoring is an important mechanism for protection and audit. The company provides risk assessment training for both operation and safety continuously. For fraudulent, financial, and accounting, the company appoints Re-Add company limited to perform quarterly internal audit. Core product sections receive audits on quality and environment 3 times a year by well-trained personnel.
5. For compliance with product regulations and code of conduct that has impact on sustainability:
  - a. Oekotex Standard 100 by Swiss Testex

- b. Carbon Footprint by TGO (Thailand Greenhouse Gas Management Organization)
- c. Water effluent BOD by soil testing
- d. Safety and health in work place
- e. Annual check-up for employees
- f. Safety audit and safety equipment readiness
- g. Drug tests

From a long experience with only Nylon as main material, the company realizes the risk of material, energy, and water shortages in the future. Therefore, joint research on other synthetic materials were conducted on Polyester, PBT (Poly Buty Terephthalate) from recycled plastic bottles, PLA from corn starch to create variety and lessen environmental impact at the same time.

## In Process Social Responsibility

### ● The Importance of Stakeholders

The company's stakeholders include customers, employees, suppliers, shareholders, environment, and community.

**Customers** The company values customers by delivering quality products from the ISO9001 certified production of international standard. Services are rendered equally to large or small customers. Pricing is fairly determined by market condition. Satisfaction surveys are performed annually. Complaints and suggestions were openly welcome and used to improve products and services in response to customers' demand. This practice is in compliance with fair business conduct and responsibility to consumers.

**Employees** The company provide lodgings for employees from upcountry's, as well as transportation's to and from work for local residents. Interest-free loan is provided for personal necessities. Training's in work skilled are provided regularly, including scholarships for employees wanting to further their education's. Even during economic hardship and loss-making years, bonuses are still disbursed according to company's ability, and there has been no laying off.

These practices adhere to human rights recognition and fair treatment to work force.

**Suppliers** Suppliers and service providers are treated well. The company is highly admired by its punctual payments. This practice complies with fair business conduct.

**Shareholders** The company was highly ranked in its openness in shareholders meetings. Factory tours are arranged regularly. The company also puts hard effort to create profits and to offset accumulated loss so that dividend can be resumed.

**Environment and Community** Having realized the impact on environment from its production activities, the company employs international standards to care for environment and mitigate the impact by continuously control and prevent pollution's:

1. Environment Management Standard (ISO 14001) assesses both resources utilization and environmental impact from every process of work. KPI for each department is set and protection plan is devised to minimize impact and prevent recurring. This process is continuously monitored and followed up every quarter.

2. Clean Technology is used to minimize resource consumption, such as recycling of used

water, collection of rain water to supplement water supply, RO process for de-mineralized water production. A committee is set up to monitor releases of waste and overuse of resources every month, to find the root causes, and preventive measures.

3. Energy conservation projects are done continuously, which include, so far, energy saving light-bulbs, high-efficiency motors, waste heat recovery, etc. New ideas are still forthcoming from small group activities.

4. Raw material recovery process from extraction waste water boost material utilization rate as well as protect the environment.

5. Employee energy awareness campaign is done continuously which includes exhibitions and contests every year.

6. Paperless document system reduces paper consumption.

7. Introduction of Environment-friendly products, such as dope-dyed nylon yarn that does not require dyeing, lessen energy consumption and water treatment process.

### After Process Social and Environment Responsibility

#### ● Support for Education – Study Tour

The company provide support for education by inviting students from different institutions, both vocational and university levels, to learn real working experience. Each year more than 20 students from both work-study program and summer apprenticeship come to work at the factory. In 2013, the company joined the “Work-Study Program” arranged by the Federation of Thai Industries to support the Scholarship Project hosted by the Office of Privy Council and received 10 students for training. Furthermore, the

factory is host to many groups from universities that offer synthetic fiber manufacturing, associations, institutes, and organizations who come to see real production, and/or energy management , and to gain some tips to be applied to their own organizations.

#### ● Support to Society

- On 19 June 2017, AFC joined the activity in making wood flowers for the royal cremation ceremony at Bangpoo Industrial Estate (BIE), Samutprakarn,

- AFC donated black & white taffeta fabric to Watpa Phukon, Udonthani, to decorate for mourning the late King Bhumibol Adulyadej.

- During 21 – 24 October 2016, AFC took part in selling special cheap price the black & white taffeta fabric for mourning decoration purpose at Department of International Trade Promotion (DITP) and Bangpoo Industrial Estate (BIE).

- In 2015/2016, the company raised 555,999 Baht to support the construction of a multi – purpose building at Phukon Forest Monastery (Watpa Phukon) for the public use of the community in Na Kam Yai village, Baan kong subdistrict, Na young district, Udonthani.

- In 2015, the company donated fabric to Phukon Forest Monastery in Udonthani, and Other

temper in Samutprakarn for use in activities during important religion ceremonies

- Employees at the head office join blood donation every three months at the Wall Street Tower, Bangkok.
- Support Thai Red Cross by donating blood every 3 months in Samutprakarn.
- Donating merchandises for the Annual Thai Red Cross Fair, Samutprakarn Red Cross Fair, Children Fair, etc.

#### Responsibility to Employees

##### ● Human Resource Development

##### THE FISCAL YEAR 2016/2017

##### Company Internal Activities

- Organized ISO 9001 : 2015, ISO 14001 : 2015 course seminar to all employees.
- Practicing in accident prevention, and firefighting.
  - Campaigning for all employees to do the 5S system in each unit of organization.
- Training of Social Security for all level employees.
- Held 5 sessions of Enterprise Resource Planning (ERP) system training.

### Company External Activities

- Provided relevant staffs to attend the full course seminar of ERP system.
- Encourage employees to attend technician & workmanship training course at Department of Skill Development, in Samutprakarn.
- Outside visiting at the 5S factories, e.g. Thairung Co., Ltd., etc.
- Took part in exhibition of Factory Water Management with The Water Sustainability Institute, of The Federation of Thai Industries (FTI).

In the years 2015/2016, the management of energy is certified by ISO 50001 : 2011

In the years 2011-2012, the company set a target for all employees to undergo Lean Manufacturing training in order to reduce waste in the production process, and reduce impact on environment and health of employees and community. The result was a gratifying success

as production waste was reduced and work environment was improved.

The company supports employees' potential development, exploring new things, and presenting their talents through training and work improvement projects, by providing a library, off-site seminars and factory visits. The company also provides opportunities for employees to present their ability and ideas through suggestion system, prize money, walk rally activities, exhibitions, and various campaigns.

The development of the mind and moral is also enhanced by providing sermons by priests on a regular basis.

Aside from those set by laws, the company provides various additional welfares beyond basic salary, i.e. living allowance, retirement pension, yearly bonus, prize money for attendance,

outstanding employee awards, and cost reduction efforts, uniforms, transportation to and from work, dormitories with free electricity and water, free rice 4 times a day, sports facility, clubhouse, cooperatives, etc.

The company also provides interest-free financial aids to employees twice a year, and stipends for social functions such as wedding, childbirth,

school fee, sickness, accidents, ordainment, death, etc.

The company has a policy to hire handicapped and over 60 year-old persons in appropriate jobs in order to reduce burden to their family, and to help them live meaningfully and happily within the society.

As the company realizes around-the-clock safety for employees, group life and accident insurance is provided by the payroll trust system.

To enhance safety in work place, fire drills are conducted regularly. Structures and work place including infrastructures and safety equipment's are amply provided, and monitored for correct usage.

To enhance employees' health, annual check-up is provided to all employees. Medical fees for both in-patient and out-patient treatments are partial provided in addition to the infirmary with staff around the clock.

For physical fitness, the company supports intra-company sports activities regularly.

For religions and community support, the company is active in yearly merit making to nearby temples, community centers, orphans, disabled, and senior organizations, e.g. SOS Children's Village of Thailand, Samutprakarn, Siri Wattana Cheshire Foundation, Rangsit Babies Home, Poh Teck Tung Foundation, etc.

# Controlling System and Risk Management

## Internal Control

The fourth Audit Committee was appointed in 2017 to oversee the company's operation. The concluded result of the internal audit was satisfactory. The Audit Committee also gave explanation and advice to the management to enhance the efficiency of the company's internal control.

Every meeting of the Board of Directors was attended by the Audit Committee. The Board of Directors approved the Audit Committee's conclusion that the company's internal control was sufficient and proper, with appropriate improvement, befitting changes in situation, to allow the company to meet its objective and comply with the law and relevant regulation.

The company engaged Re-Add Company Limited as internal auditor for the continuity of the internal audit process. Plans of audit were drawn up for every system in the business process. Reports from the internal auditor were directed to the Audit Committee and top executives. There have not been any reported significant shortcomings in the systems audited so far.

Furthermore, the audit of the company's accounts for the year 2016/2017 by C&A Audit Office Co., Ltd., the company's CPA, did not point to any significant weaknesses in the company's internal control which could lead to damages.

## Conclusion regarding Internal Control System

The company realizes the importance of risk management and believes that sufficient and appropriate internal control system can enhance efficiency, reduce or prevent risk and damages, and ensure compliance with all relevant laws and regulations. The important measures for internal control are listed below:

1. Clearly stated Corporate Governance Policy
2. Suitable organizational structure to the company's objective and operation. Responsibility and lines of command for each unit were well defined.
3. Work policy, work instructions, and operating manuals were well documented.
4. Authority for management and operators were clearly defined.
5. The Executive Board will consider and review the framework for risk management and risk analysis to ensure a proper level of risk exposure and a consistent compliance to the risk policy.
6. Continuously improve the information system to cover financial, operational, and compliance data.

## Year-end Results and Analysis

Unit : Thousand Baht	2017	2016	Difference (%)
Total Sales	811,922	759,188	+6.95%
Total Sales Export	548,994	535,686	+2.48%
Gross Profit	36,395	22,119	+64.54%
Selling Expenses	19,837	21,445	-7.50%
Administrative Expenses	21,302	23,586	-9.68%
Other Revenues	9,678	9,521	+1.65%
Interest Expenses	0	25	-99.99%
Net Income after Income Tax	8,320	(11,949)	+169.63%
Net Income to Sales	1.02%	-1.57%	
Accounts Receivable	129,653	136,379	-4.93%
Inventories	177,479	152,427	+16.44%
Current Ratio	14.10	14.65	
Quick Ratio	10.31	10.79	
Debt/Equity Ratio	0.17	0.15	

Net sales this year increases slightly from last year, mainly in the domestic portion while export portion increases only mildly. However, due to a more stable raw material price, and adjustment of production in certain products which resulted in a significant cost reduction, gross margin improved considerably. Meanwhile, selling expenses and administrative expenses drop noticeably from last year, mostly due to the reduction in ocean freight and better control on expenses. Other income is in line with last year while interest expense is virtually zero this year as we actively manage our cash flows. As a combined result, a small net profit is realized this year as compared to a net loss of last year.

On this year's assets quality, account receivable decreases slightly despite an increase in sales, a result of quicker collection process. Inventory, on the other hand, increases significantly from last year due partly to the higher price of raw material at year-end compared to that of last year. The increase is also due to fact that the newly improved nylon chip product should not be mixed

with the old lot. Both qualities must be carried in the inventory for many customers during this transition period, resulting in an increase in the finished product inventory. However, work-in-process drops noticeably from last year due to the modification of production process and business model, resulting in a more efficient production and less burden on cash flows.

On financial structure, the liquidity ratios are similar to last year, however, gearing ratio increases slightly due to a much higher deferred income tax payable which is the result of the new land revaluation this year to reflect the much higher market value, not due to any increase in loan or credit from banks or other creditors.

In summary, the company enjoys a slightly better performance than last year due to the improved market condition, a more stable raw material price, production process change, and better control on costs. At the same time, product improvement was achieved to better respond to the ever-increasing demand from customers.

# Audit Committee's Report

## Shareholders of Asia Fiber Public Company Limited,

The audit committee comprises 3 qualified personnel who are also independent directors.

The Audit Committee's term of office is three year, A member of the Audit Committee who vacates his/her office by rotation may be re-appointed.

Each meeting was attended by the company's high-level executives, head of internal auditor unit, and the certified public auditors, except one meeting with the certified public auditors which was not attended by company's high-level executives.

The audit committee performed its duty as assigned by the company's board of directors, by reviewing the company's financial statements as audited and reported by the certified public auditors. Issues found from the auditing were also discussed to ascertain the correctness in substance and compliance to the generally accepted accounting principles. The internal auditor's report, with improvement measures in significant areas and follow-up on such measures, was also reviewed to achieve adequate and effective internal control. In addition, management was also present to offer opinions, analysis on performance, and answers to questions in each of the meeting.

The audit committee reviewed company's operation and its compliance with the Securities and Exchange Act, rules and regulations of the Stock Exchange of Thailand, and/or laws governing the business engaged by the company. Recommendations were made on good corporate governance, review of important risk aspects, and review of related transactions during each meeting.

The audit committee monitored the company's administration in important issues found during reviews of both the certified public auditor and the internal auditor. Corrective actions taken were summarized and reported regularly in the board meetings in order to improve the company's efficiency and to prevent breaches of the Securities and Exchange Act, rules and regulations of the Stock Exchange of Thailand, and/or laws governing the business engaged by the company, with an aim toward the highest benefit to shareholders and confidence of all parties concerned.

As part of its duty, the audit committee selected the certified public accountant to be proposed by the board of directors for the approval by the shareholders, with consideration on independence, performance, experience, together with the proposed audit fee. In conclusion, the audit committee selected Mrs. Chitana Techamontrikul, c.p.a. 5131, and/or Miss Jintana Mahavanich, c.p.a. 4687, who represent C & A Audit Office Co., Ltd., to be certified public accountants for the company for another term, and concurred to an annual audit fee, including quarterly reviews, of not more than 700,000 Baht.

For the fiscal year 2016/2017 just ended, the audit committee was able to work independently with excellent cooperation from the management, employees, and all parties involved. Hence, we are of the opinion that the company has sufficient internal control system, and no shortcomings of significance that could effect the company's financial statements were found. We also did not find any non-compliance to the government's rules or regulations. Nevertheless, as at June 30, 2017 and 2016, the company had long-outstanding (more than 6 months) trade accounts receivable from two related companies (Thai Far East Co., Ltd. and T.F.E. Trading Co., Ltd.) totalling Baht 124.32 Million. The land and construction thereon of such companies are mortgaged as collateral for these receivables. The appraised value based on reports of an independent appraisal firm dated March 23, 2015 amounted to Baht 106.69 Million (at market price) and Baht 64.01 Million (at force sale price). Based on conservative basis, the company provided an allowance for doubtful accounts of Baht 74.67 Million as at and June 30, 2017 and 2016.

The management believes that allowance for doubtful accounts enough and adequate because force sale price cover accounts receivable-net above and the management has a policy that a debtor has to sell or transfer its collaterals to repay such debt in a suitable time.

For and on behalf of the Audit Committee

(Mr. Thirachart Viravan)  
Chairman of the Audit Committee

# Independent Auditor's Report

To the Shareholders of Asia Fiber Public Company Limited

## **Opinion**

I have audited the accompanying the financial statements in which the equity method is applied and the separate financial statements of Asia Fiber Public Company Limited, which comprise the statement of financial position in which the equity method is applied and the separate statement of financial position as at June 30, 2017, and the related statements of comprehensive income in which the equity method is applied and the separate statements of comprehensive income and the statement of changes in shareholders' equity in which the equity method is applied and the separate of statement of changes in shareholders' equity and the statement of cash flows in which the equity method is applied and the separate of statement of cash flows for the year then ended and a summary of significant accounting policies.

In my opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Asia Fiber Public Company Limited as at June 30, 2017, their financial performance and cash flows for the year then ended, in accordance with Thai Financial Reporting Standards.

## **Basis for opinion**

I conducted my audit in accordance with Thai Standards on Auditing. My responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of my report. I am independent of the Company in accordance with the Code of Ethics for Professional Accountants as issued by the Federation of Accounting Professions under the Royal Patronage of His Majesty the King as relevant to my audit of the financial statements, and I have fulfilled my other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

## **Key audit matters**

Key audit matters are those matters that, in my professional judgment, were of most significance in my audit of the financial statements of the current period. These matters were addressed in the context of my audit of the financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on these matters.

Key audit matters and how audit procedures respond are described below.

### **Allowance for devaluation of inventory**

The Company operates as a manufacturer and distributor of both nylon and fiber products for spinning and weaving industry. Cost per unit of product has a Caprolactam as the main raw material. In addition, Caprolactam's price depends upon uncontrollable factors such as oil prices, exchange rates, and global economic conditions. This factor is a risk to the Company because of the volatility of raw material prices and sales prices. As at June 30, 2017, the Company had inventories amounted to Baht 192.13 million and allowance for devaluation inventories amounted to Baht 14.65 million according to the note to financial statements no. 2.3.3 "Allowance for slow moving, obsolete, and deterioration of inventory" and note to financial statements no. 10 "Inventories". The recognition of such transactions was material to the financial statements and was subject to inherent risk about valuation since it depends on judgement of the Company's management which used the assumptions or information to determine the adequacy and appropriateness. Management will consider the following:

- Historical data, future sales plans, or information about the price of the main raw material - Caprolactam
- Storing period of inventory and inventory life cycle
- Slow-moving inventory that exceeds the policy
- Inventory report by comparing cost and net realizable value and/or Slow-moving inventory report.

### **Audit procedures**

I specified audit procedures to provide a reasonable assurance to judgements of management regarding an adequacy and appropriateness of allowance for devaluation of inventory in consolidated financial statements of the Company as followed:

- Analyzing and evaluating the gross profit (loss) from sales transaction
- Understanding policies and evaluate assumptions of allowance for devaluation of inventory of the Company
- Observing the inventory count to ensure whether they are existent and the Company has a proper inventory process, especially, the separation of slow-moving or obsolete inventory
- Testing the accuracy of the report used to reserve allowance for devaluation of inventory
- Reviewing the policy of allowance for devaluation of inventory of the Company whether it complies with Financial Reporting Standard

### **Other information**

Management is responsible for the other information. The other information comprise the information included in annual report of the Company, but does not include the financial statements and my auditor's report thereon. The annual report of the Company is expected to be made available to me after the date of this auditor's report.

My opinion on the financial statements does not cover the other information and I will not express any form of assurance conclusion thereon.

In connection with my audit of the financial statements, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained in the audit or otherwise appears to be materially misstated.

When I read the annual report of the Company, if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance for correction of the misstatement.

## **Responsibilities of Management and Those Charged with Governance for the financial statements**

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Thai Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

## **Auditor's responsibilities for the audit of the financial statements**

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Thai Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Thai Standards on Auditing, I exercise professional judgment and maintain professional scepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the financial statements. I am responsible for the direction, supervision and performance of the Company audit. I remain solely responsible for my audit opinion.

I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide those charged with governance with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, I determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

C&A Audit Office Co., Ltd.

# Note to the Financial Statements

For the years ended June 30, 2017

## 1. General information

Asia Fiber Public Company Limited was incorporated in Thailand on March 10, 1970 and has been listed in the Stock Exchange of Thailand on September 22, 1975. The company is engaged in manufacturing of nylon products.

The company's office and factory addresses are as follows :

Office 27th Floor, Wall Street Tower, 33/133-136 Surawongse Road, Suriyawongse, Bangrak, Bangkok.

Factory 406-7 Moo 7, Sukhumvit Road Km. 33.5, Tambol Bangpoomai, Muang District, Samutprakarn, Thailand.

## 2. Basis of preparation

### 2.1 Statement of compliance

The financial statements have been prepared in accordance with Thai Financial Reporting Standards (TFRS) under the Accounting Act B.E. 2543 being those Thai Accounting Standards issued under the Accounting Profession Act B.E. 2547 and the financial reporting requirements of the Securities and Exchange Commission under the Securities and Exchange Act.

The financial statements have been prepared under the historical cost convention except some transactions are valued at fair price as disclosed in the accounting policies below.

An English version of the consolidated and company financial statements have been prepared from the statutory financial statements that are issued in Thai language. In the event of a conflict or a difference in interpretation between the two languages, the Thai language statutory financial statements shall prevail.

### 2.2 Presentation currency

The financial statements are prepared and presented in Thai Baht.

### 2.3 Use of estimates and judgements

The preparation of financial statements in conformity with TFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which estimates are revised and in any future periods affected.

Information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the effect on the amount recognised in the financial statements is included in the following notes:

## 2.3 Use of estimates and judgements (continue)

### 2.3.1 Leases

In determining whether a lease is to be classified as an operating lease or finance lease, the management is required to use judgment regarding whether significant risk and rewards of ownership of the leased asset has been transferred, taking into consideration terms and conditions of the arrangement

### 2.3.2 Allowance for doubtful accounts

In determining an allowance for doubtful accounts, the management needs to make judgment and estimates based upon, among other things, past collection history, aging profile of outstanding debts and the prevailing economic condition.

### 2.3.3 Allowance for obsolete, slow-moving and defective inventories

The company maintains an allowance for obsolete, slow-moving and defective inventories to reflect impairment of inventories. The allowance is based on consideration of inventory turnover and deterioration of each category.

### 2.3.4 Impairment of assets

The Company treats assets as impaired when the management judges that there has been a significant decline in the fair value below their cost or where other objective evidence of impairment exists. The determination of what is “significant” requires.

### 2.3.5 Investment properties

Investment properties are properties which are held to earn rental income, for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes.

### 2.3.6 Property plant and equipment/Depreciation

In determining depreciation of plant and equipment, the management is required to make estimates of the useful lives and residual values of the company’s plant and equipment and to review estimate useful lives and residual values when there are any changes.

In addition, the management is required to review property, plant and equipment for impairment on a periodical basis and record impairment losses in the period when it is determined that their recoverable amount is lower than the carrying cost. This requires judgments regarding forecast of future revenues and expenses relating to the assets subject to the review.

### 2.3.7 Deferred tax assets

Deferred tax assets are recognised in respect of temporary differences only to the extent that it is probable that taxable profit will be available against which these differences can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of estimate future taxable profits.

## 2.3 Use of estimates and judgements (continue)

### 2.3.8 Retirement employee benefits

The company has commitments on retirement benefits to employees under the Thai Labour Law. The amount of provision presented in the statement of financial position represents the present value of employee benefit obligations which is determined on an actuarial basis using various assumptions. The assumptions used in determining the net period cost for employee benefits includes the discount rate, the rate of salary inflation and employee turnover and others. Any changes in these assumptions will impact the net periodic cost recorded for employee benefits. On an annual basis the company determines those assumptions i.e. the appropriate discount rate, which should represent the interest rate that should be used to determine the present value of future cash flows currently expected to be required to settle the employee benefits. In determining the appropriate discount rate, the company considers the current yields on long-term government bonds.

## 3. New financial reporting standards

### 3.1 Accounting standards that became effective in the current accounting year

The Company adopted the revised (revised 2015) and new financial reporting standards issued by the Federation of Accounting Professions which become effective for fiscal years beginning on or after January 1, 2016. These financial reporting standards were aimed at alignment with the corresponding International Financial Reporting Standards, with most of the changes directed towards revision of wording and terminology, and provision of interpretations and accounting guidance to users of standards. The adoption of these financial reporting standards does not have any significant impact on the Company's financial statements.

### 3.2 Thai Financial Reporting Standards announced in the Royal Gazette but not yet effective

During the current year, the Federation of Accounting Professions issued a number of the revised financial reporting standards and interpretations (revised 2016) which is effective for fiscal years beginning on or after January 1, 2017. These financial reporting standards were aimed at alignment with the corresponding International Financial Reporting Standards with most of the changes directed towards revision of wording and terminology, and provision of interpretations and accounting guidance to users of standards, as follows:

<b><u>Thai Accounting Standards (TAS)</u></b>		<b><u>Effective date</u></b>

Management of the Company believe that the revised and new financial reporting standards and interpretations will not have any significant impact on the financial statements when they are initially applied.

#### **4. Significant accounting policies**

##### **4.1 Revenue and expenses recognition**

Revenues from sales of goods and services net of output tax, rebates and discount. Revenues from sales of goods are recognized when significant risk and rewards of ownership of the goods are transferred to the buyer.

Revenues from services are recognized when the service is rendered.

Revenues from interest are recognized by timing and other income are recognized by accrual basis of accounting.

Cost of sales and expenses are recognized by accrual basis of accounting.

##### **4.2 Cash and cash equivalents**

Cash and cash equivalents are carried in the statement of financial position at cost which comprise cash on hand, deposits held at call with banks or other short-term highly liquid investments with original maturities of three months or less and free from restrictions.

##### **4.3 Trade accounts receivable and allowance for doubtful accounts**

Trade accounts receivable are carried at the original invoice amount and subsequently measured at the remaining amount less any allowance for doubtful receivables based on a review of all outstanding amounts at the year-end. The amount of the allowance is the difference between the carrying amount of the receivable and the amount expected to be collectible. Bad debts are written-off during the year in which they are identified and recognised in profit or loss within management expenses.

##### **4.4 Inventory valuation**

Inventories are valued at cost or net realizable value, whichever is lower. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

The costs of inventories purchased comprise the purchase price and other costs directly attributed to the acquisition of goods. Manufacturing cost of finished goods and work in process comprises from raw materials, labour and manufacturing overhead. Inventories are valued at moving average cost. Goods in transit are valued at cost price.

The company has policy to approximate the allowance for decline in value of inventories by the management's review.

#### 4. Significant accounting policies (continue)

##### 4.5 Investments

Investment in associate is accounted for in the financial statements in which equity method is applied using the equity method.

Investment in associate is accounted for in the separate financial statements using the cost method.

The investments in shares of other company (general investment), which held for long-term purpose, are recorded at cost. Gains or losses are taken up in the accounts when the investments are disposed. The cost of investment disposed during the year is determined by the weighted average method.

Temporary investment from investment in unit trust of mutual fund are classified as investment available for sale and presented on statement of financial position at fair value on the date of investment measurements.

A test for impairment is carried out when there is an indicating factor that an investment might be impaired. If the carrying value of the investment is higher than its recoverable amount, impairment loss is charged to the statement of income.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the statement of income. When disposing of part of the company of a particular investment in debt or equity securities, the carrying amount of the disposed part is determined by the weight average carrying amount of the total holding of the investment.

The weight average method is used for computation of the cost of investment.

##### 4.6 Investment properties

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and allowance for loss on impairment.

Depreciation of investment properties are calculated by reference to their costs on the straight-line basis over the following estimated useful lives:

	<b>Year</b>
Buildings	20

Depreciation of investment properties is recognized as expense for each accounting period.

On disposal of investment properties, the difference between the net disposal proceeds and the carrying amount of the asset is recognised in profit or loss in the year when the asset is derecognised.

Depreciation of investment properties is recognized as expense for each accounting period.

On disposal of investment properties, the difference between the net disposal proceeds and the carrying amount of the asset is recognised in profit or loss in the year when the asset is derecognised.

#### 4. Significant accounting policies (continue)

##### 4.7 Property, plant and equipment

Land is stated at appraised value. Plant and equipment are stated at cost less accumulated depreciation and allowance for loss on impairment of assets (if any).

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

Depreciation is calculated on the straight line method to write off the cost of each asset, to their residual values over their estimated useful lives as follows.

Estimated useful lives are follower :

	Year
Buildings and improvements	10 - 20
Machinery and equipment	5 - 10
Furniture, fixtures and office equipment	5 - 10
Vehicles	5 - 8

There is no depreciation on land and land improvements.

Depreciation is recognized as expense for each accounting period.

The assets' residual values and useful lives are reviewed and adjusted if appropriate, at the end of each reporting period.

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount and are recognised within "other gains or losses, net" in profit or loss.

##### 4.8 Intangible assets

###### Computer software

Acquired computer software licences are capitalised as intangible assets on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised over their estimated useful lives 5 years.

Intangible assets are recorded at cost and will not revalued. The carrying amount of each intangible asset is reviewed annually and adjusted for impairment where it is considered as necessary.

#### **4. Significant accounting policies (continue)**

##### **4.9 Impairment of asset**

The carrying amounts of the company's assets are reviewed on each statement of financial position date to determine whether there is any indication of impairment. If any such indication exists, the assets' recoverable amounts are estimated.

An impairment loss is recognised whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. The impairment loss is recognised in the statement of income.

##### Calculation of recoverable amount

The recoverable amount is the greater of the assets' net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

##### Reversals of impairment

An impairment loss is reversed if there has been change in the estimates used to determine the recoverable amount.

An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

##### **4.10 Accounting for leases - where the company is the lessee**

Long term leases which substantially transferred all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the inception of the lease at the lower of the fair value of the leased property or the present value of the minimum lease payments.

The outstanding rental obligations, net of finance charges, are included in other long-term payable. The interest element of the financial cost is charged to the statement of income.

The asset acquired under finance leases while depreciation is carried throughout the useful life of leased asset. However, if there is uncertainty in the right of ownership when the contract is terminated, depreciation is carried according to useful life of leased assets or life of leased contract whichever the period is lower.

Long term leases not transferring a significant portion of the risks and rewards of ownership to the lessee are classified as operating leases. Payment made under operating leases (net of any incentives received from the lessor) are charged to the statement of income on a straight-line basis over the period of the lease.

When an operating lease is terminated before the lease period has expired, any payment required to be made to the lesser by way of penalty is recognized as an expense in the period in which termination takes places.

#### **4. Significant accounting policies (continue)**

##### **4.11 Employee benefits**

###### **Short term employee benefits**

Salaries, wages, bonuses and contributions to the social security fund are recognized as expenses when incurred.

###### **Post-employment benefits (Defined benefit plans employee benefits)**

The company has obligations in respect of the severance payments which paid to employees when their retirement have incurred under labor law. The company treats these severance payment obligations as a defined benefit plan.

The obligation under the defined benefit plan is determined by a professionally qualified independent actuary, using the projected unit credit cost method. Such determination is made based on various assumptions, including discount rate, future salary increase rate, staff turnover rate, mortality rate, and inflation rates.

Actuarial gains and losses arising from post-employment benefits are recognised in other comprehensive income.

##### **4.12 Provision**

Provision are recognized when the company has a present legal or constructive obligation as a result of past event, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimation of the amount can be made. Where the company expects a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain.

##### **4.13 Financial instrument**

Financial assets carried on the statement of financial position include cash and deposits at financial institution, trade accounts receivable. Financial liabilities carried on the statement of financial position include trade account payable.

The particular recognition methods adopted are disclosed in the individual accounting policy statements associated with each item.

##### **4.14 Foreign currency translation**

###### **Functional and presentation currency**

Items included in the financial statements of company is measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Thai Baht, which is the Bank's functional and presentation currency.

###### **Transactions and balances**

Foreign currency transactions are translated into Thai Baht using the exchange rates prevailing at the date of the transaction Monetary assets and liabilities denominated in foreign currency are translated to Thai Baht at the exchange rate prevailing at the statement of financial position date. Gains and losses resulting from the settlement of foreign currency transactions, and from the translation of monetary assets and liabilities denominated in foreign currencies, are recognised in the profit or loss.

##### **4.15 Earnings (loss) per share**

Earnings per share is determined by dividing the net earnings for the period by the weighted average number of issued and paid-up of common stock during the period.

#### **4. Significant accounting policies (continue)**

##### **4.16 Legal reserve**

Section 116 of the Public Companies Act B.E. 2535 requires that the company shall allocate not less than 5 percent of its annual net profit, less any accumulated losses brought forward, to a reserve account (“legal reserve”), until this account reaches an amount not less than 10% of the registered authorized capital. The legal reserve is not available for dividend distribution.

##### **4.17 Income tax**

###### Income tax

Income tax expense represents the sum of corporate income tax currently payable and deferred tax.

###### Current tax

Current income tax is provided in the accounts at the amount expected to be paid to the taxation authorities, based on taxable profits determined in accordance with tax legislation.

###### Deferred tax

Deferred income tax is provided on temporary differences between the tax bases of assets and liabilities and their carrying amounts at the end of each reporting period, using the tax rates enacted at the end of the reporting period or highly probable to be effective at the end of the reporting period.

The company recognise deferred tax liabilities for all taxable temporary differences while they recognise deferred tax assets for all deductible temporary differences and tax losses carried forward to the extent that it is probable that future taxable profit will be available against which such deductible temporary differences and tax losses carried forward can be utilised.

At each reporting date, the company review and reduce the carrying amount of deferred tax assets to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

The company record deferred tax directly to shareholders' equity if the tax relates to items that are recorded directly to shareholders' equity.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

##### **4.18 Management benefit expenses**

Management benefit expenses represents the benefits paid to the company's management such as salaries and related benefit including the benefit paid by other means. The company's management is the persons who are defined under the Securities and Exchange Act.

##### **4.19 Operating segments**

Operating Segments is requires the presentation and disclosure of segment information based on the internal reports regularly reviewed by the company's chief operating decision maker in order to assess each segment's performance and to allocate resources to those segments.

#### 4. Significant accounting policies (continue)

##### 4.20 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between buyer and seller (market participants) at the measurement date.

The Company use the market approach to measure their assets and liabilities that are required to be measured at fair value by relevant financial reporting standards, except that the financial techniques approach is used when there is no active market or when a quoted market price is not available.

##### Fair value hierarchy

These fair value measurements are categorised into different levels in the fair value hierarchy based on the inputs to valuation techniques used. The different levels are defined as follows.

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: unobservable inputs for the asset or liability.

#### 5. Related party transactions

Related parties comprise enterprises and individuals that control, or are controlled by, the Company, whether directly or indirectly, or which are under common control with the Company.

They also include associated companies and individuals which directly or indirectly own a voting interest in the Company that gives them significant influence over the Company, key management personnel, directors, and officers with authority in the planning and direction of the Company's operations.

The company had significant business transactions with related party, balance of accounts and transaction between related party is presented in financial statement used for commercial price under market price or near market price or by contract price.

The followings are relationships with enterprises and individuals that control, or are controlled by, the Company, whether directly or indirectly, or which are under common control with the Company as follows :

Company's name	Types of relation	Relationship
Thai Far East Co., Ltd.	Related company	Directorship

## 9. Trade and other receivables

(Unit : Baht)

		As at	
		June 30, 2017	June 30, 2016
<b>Related party</b>			
Trade receivables		49,824,198.80	49,758,115.60
Other receivables		4,740,754.63	4,740,754.63
<b>Unrelated parties</b>			
Trade receivables		79,828,650.84	86,620,638.21
Other receivables		4,622,121.18	5,675,933.89
<b>Total</b>		<b>139,015,725.45</b>	<b>146,795,442.33</b>

The aging analysis of the above trade receivables are as follows :

(Unit : Baht)

		As at	
		June 30, 2017	June 30, 2016
<u>Trade receivable - related party</u>			
Current to 3 months		174,350.08	108,266.88
Over 12 months		124,320,137.40	124,320,137.40
Total		124,494,487.48	124,428,404.28
<u>Less</u> Allowance for doubtful accounts		(74,670,288.68)	(74,670,288.68)
<b>Total trade receivables - related parties- net</b>		<b>49,824,198.80</b>	<b>49,758,115.60</b>

As at June 30, 2017 and 2016, the company had long-outstanding (more than 6 months) trade accounts receivable from two related companies (Thai Far East Co., Ltd. and T.F.E. Trading Co., Ltd.) totalling Baht 124.32 Million and Baht 124.32 Million, respectively. The land and construction thereon of such companies are mortgaged as collateral for these receivables. The appraised value based on reports of an independent appraisal firm dated March 23, 2015, at market price Baht 106.69 Million and at force sale price Baht 64.01 Million.

The management believes that allowance for doubtful accounts enough and adequate because force sale price cover accounts receivable-net above and the management has a policy that a debtor has to sell or transfer its collaterals to repay such debt in a suitable time.

## 9. Trade and other receivables (continue)

### 9.1 Trade receivables

		(Unit : Baht)	
		As at	
		June 30, 2017	June 30, 2016
<u>Trade receivables - unrelated parties</u>			
Notes receivable			
Not over due		11,238,672.29	9,276,515.14
Over 3 month to 6 months		35,053.20	-
Over 12 months		1,301,813.74	1,301,813.74
Trade accounts receivable			
Current to 3 months		67,824,584.86	76,252,835.09
Over 3 month to 6 months		730,340.49	1,091,287.98
Total		81,130,464.58	87,922,451.95
<u>Less</u> Allowance for doubtful accounts		(1,301,813.74)	(1,301,813.74)
<b>Total trade receivables - unrelated parties- net</b>		<b>79,828,650.84</b>	<b>86,620,638.21</b>

As at June 30, 2017 and 2016, the allowance for doubtful accounts amounted to Baht 1.30 Million. The management believes such allowance is adequate to absorb possible losses on doubtful accounts.

### 9.2 Other receivables

## 17. Deferred tax assets (deferred tax liabilities) (continue)

(Unit : Baht)

	As at	
	June 30, 2017	June 30, 2016
Unrecognized tax loss	58,482,288.21	71,437,097.03

The company has not recognized tax loss as deferred tax assets since managements assessed that there was economic uncertainty. Therefore, the company cannot estimate certain future operating performance to determine future usage for such assets. Consequently, the company will recognise deferred tax assets when tax obligations occurred.

## 18. Employee benefit obligations

(Unit : Baht)

	As at	
	June 30, 2017	June 30, 2016
Employee benefit obligations at beginning of year	45,226,293.00	46,116,298.00
<u>Add</u> Employee benefit expenses during the year	2,184,905.00	2,249,287.00
Financial cost (interest) during the year	1,165,228.00	1,182,479.00
<u>Less</u> Payments employee benefit during the year	(2,924,593.00)	(4,313,402.00)
<u>Add(Less)</u> Actuarial (gains)losses on defined employee benefit plans	591,515.00	(8,369.00)
<b>Employee benefit obligations at end of year</b>	<b>46,243,348.00</b>	<b>45,226,293.00</b>

Employee benefit expenses the company recognized in the profit (loss) for the year ended June 30, 2017 and 2016 amounted to Baht 3.35 Million and Baht 3.43 Million, respectively.

For the year ended June 30, 2017 and 2016 the company recognized Actuarial gains(losses) arising from post-employment benefits in profit/loss in the financial statements amount Baht (0.59) Million and Baht 0.01 Million, respectively.

The principal actuarial assumptions used were as follows :

(Unit : Percentage)

	As at June 30,	
	2017	2016
Discount rate	2.63	2.63
Future salary increases rate	3.00	3.00
Voluntarily resignation Rate	0 - 35.00	0 - 35.00

# 18. Employee benefit obligations (continue)

Amounts of defined benefit obligation for the current and previous four periods are as follows :

	Defined benefit obligation
Year 2017	46,243,348.00
Year 2016	45,226,293.00
Year 2015	46,116,298.00
Year 2014	50,485,913.01
Year 2013	48,603,621.00

## Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below.

( Unit : Baht)

	For the years ended June 30, 2017	
	Increase	Decrease
Discount rate (1% movement)	43,693,207.00	50,514,014.00
Future salary growth (1% movement)	51,625,573.00	42,687,847.00
Voluntarily resignation Rate (1% movement)	43,551,774.00	47,917,979.00

( Unit : Baht)

	For the years ended June 30, 2016	
	Increase	Decrease
Discount rate (1% movement)	42,762,829.00	49,631,906.00
Future salary growth (1% movement)	50,236,046.00	42,186,992.00
Voluntarily resignation Rate (1% movement)	42,622,624.00	47,080,970.00

## 19. Income tax (expenses) revenue

Corporate income tax was calculated on profit before income tax for the year, multiplied by the estimated effective tax rate for the year income (expense) tax are as follows :

(Unit : Baht)

	Financial statements in			
	which equity method is applied		Separate financial statements	
	For the year ended June 30,			
	2017	2016	2017	2016
Current income tax :				
Corporate income tax charge	-	-	-	-
Deferred tax :				
Relating to origination and reversal of temporary differences	1,382,009.84	1,953,107.94	1,382,009.84	1,953,107.94
Income (expense) tax expense reported in the statements of comprehensive income	1,382,009.84	1,953,107.94	1,382,009.84	1,953,107.94

Reconciliation between income tax expenses and the product of accounting profit multiplied by the applicable tax rates :

(Unit : Baht)

	Financial statements in			
	which equity method is applied		Separate financial statements	
	For the year ended June 30,			
	2017	2016	2017	2016
Accounting profit (loss) before tax	6,937,650.43	(13,902,482.68)	6,049,073.64	(13,378,965.05)
Applicable tax rate	20%	20%	20%	20%
Accounting profit (loss) before tax multiplied by applicable tax rate	1,387,530.09	(2,780,496.54)	1,209,814.73	(2,675,793.01)
Effects of: :

- Gains on revaluation of land	(42,120,000.00)	-
<b>Total</b>	<b>(42,476,316.51)</b>	<b>(521,746.06)</b>

## 20. Financial instruments

The company does not hold or issue derivative instruments for speculative or trading purposes.

### 20.1 Liquidity risk

Liquidity risk arises from the problem in raising funds adequately and in time to meet commitment as indicated in the financial statements. The management, based on the company's current financial position and results of operations and its forecasted financial information, believes that at present the company has no such risk.

### 20.2 Credit risk

Credit risk is the risk that a counterparty is unable or unwilling to meet a commitment that it entered into with the company. The risk is controlled by the application of credit approvals, limits and monitoring procedures.

The carrying amount of accounts receivable recorded in the statement of financial position, net of allowance for doubtful accounts represents the maximum exposure to credit risk.

### 20.3 Interest rate risk

Interest rate risk means the risk that the value of financial instruments will change because the changes of interest rate. The company is exposed to interest rate risk relating primarily to its deposits. So the company is exposed to the risk of the fluctuation in the future market rate.

Significant financial assets and liabilities as at June 30, 2017 and 2016 classified by type of interest rates are summarised in the table below :

	Financial statements in which equity method is applied						(Unit : Million Baht)		(Unit : %)
	Floating interest rate		Fixed interest rate		Non-interest bearing		Total		Interest rate
	2017	2016	2017	2016	2017	2016	2017	2016	% per annum
<b>Financial assets</b>									
Cash and cash equivalents	132.81	142.31	-	-	12.31	10.22	145.12	152.53	0.125-0.530
Temporary investment	-	-	-	-	198.54	196.17	198.54	196.17	-
Trade accounts receivable-net	-	-	-	-	139.02	146.80	139.02	146.80	-
<b>Financial liabilities</b>									
Trade and other payables	-	-	-	-	45.76	41.31	45.76	41.31	-

#### 20.4 Fair value of financial instruments

Given that almost financial assets and financial liabilities are short-term include cash and bank which interest rate increase/decrease under market interest rates, the Company's management believes that the fair value of financial assets and financial liabilities does not materially differ from their carrying value.

As at June 30, 2017 and 2016, the Company had the following financial assets that were measured at fair value using different levels of inputs as follows :

		(Unit : Baht)			
		2017			
		Level 1	Level 2	Level 3	Total
<b>Financial assets</b>					
Investment in unit trusts		-	198,544,116.23	-	198,544,116.23

		(Unit : Baht)			
		2016			
		Level 1	Level 2	Level 3	Total
<b>Financial assets</b>					
Investment in unit trusts		-	196,171,018.70	-	196,171,018.70

#### Valuation techniques and inputs to Level 2.

The fair value of unit trusts is determined from their net asset value as at the end of the reporting period announced by each asset management company.

During the current period, there were no transfers between within the fair value hierarchy.

#### 20.5 Foreign currency risk
